

MIDIRS Midwifery Digest Index 2023

A

Aboriginal women 357
anxiety 82
apprenticeships 319–320
auscultation 259–266
autism 302–303

B

bereavement care 55–63, 241–247
birth choices 210–215
birth weight 347
Black women 6–8, 306–308, 334–341
breastfeeding
 effect of mode of delivery 371–373
 exclusive 187–193
 and hormonal contraception 360
 during pregnancy 90–93
 premature infants 84–89
 promotion and support 90–93, 183–186,
 364–373
breech presentation 64–69

C

caesarean section 371–373
cannabis 154–159
cardiotocography 259–266
cerebral palsy 358
choice, of birth 210–215
clinical incidents 24–29
compassionate care 227–234
complementary therapies 34–35, 254–259
conferences 319–320
continuity of care 146–153
contraception 170–176, 267–272, 360
COVID-19 61–63
Crohn's disease 39–42
culturally sensitive care 130–134, 206–207

D

databases 9–10
debriefing 24–29
decolonisation 6–8, 258
diabetes 70–75, 237–240
diet in pregnancy 248, 342–346
domestic abuse 332–333
drug use 154–159

E

electronic health records 118–121
ethnic minority groups 130–134, 206–207
expectant management 43–49

F

fear, of pain 160–164
fetal alcohol syndrome 285
fetal monitoring 259–266
fidelity 321–325

G

genomics 326–332

H

HIV infection 50–53
hyperemesis gravidarum 140–145, 248
hypertensive disorders of pregnancy 94
hypnosis 34–35, 254–259

I

implementation science 118–121
Indian women 206–207
induction of labour 43–49, 249–254
inequalities in health
 Black women 6–8, 306–308, 334–341
 Indian women 206–207
 marginalised groups 309–311
 Population Health Fellowship programme
 14–16
 women with complex social factors 235–
 236
infant, newborn
 admission to NICU 82
 effect of hypertensive disorders of
 pregnancy on outcomes 94
 fetal alcohol syndrome 285
 pain management 363
 sleep practices 278–284, 374
infant, premature 83, 84–89, 375
inflammatory bowel disease 39–42
influenza 348
information leaflets 249–254, 363
intensive care see neonatal intensive care
intrauterine device (IUD) insertion 170–176,
267–272

L

labour

- breech presentation 64–69
 - fetal monitoring 259–266
 - induced 43–49, 249–254
 - latent phase 160–164
 - pain perception 30–38, 160–164
 - positions in 165–169
 - shoulder dystocia 70–75
- lactation support 84–89, 371–373
- leadership 6–8, 227–234
- learning methods 123–129, 321–325
- literature searching 9–10

M

- macrosomia 70–75, 347
- magnesium sulphate 358
- maternal mortality 235–236
- Maternity and Infant Care (MIC) database 9–10
- maternity services
- decolonisation 6–8, 258
 - quality improvement 24–29, 358
 - see also* inequalities in health
- maternity support workers 304–305, 319–320
- medicalisation of childbirth 17–23
- mental health
- Aboriginal women 357
 - of adults born preterm 83
 - impact of admission to NICU on 82
 - midwives 17–23
 - perinatal suicide 115–118, 130–134
- MIDIRS (Midwives Information and Resource Service) 9–10
- midwifery care
- bereavement care 55–63, 241–247
 - breastfeeding support 90–93, 183–186, 364–373
 - breech presentation 64–69
 - compassionate care 227–234
 - continuity of care 146–153
 - genomic mainstreaming 326–332
 - integration with research 114–115
 - perineal trauma 76–81, 359
 - population health 14–16
 - routine enquiry about domestic abuse 332–333
 - screening for drug use 154–159
 - sickle cell disease 334–341
 - vaginal birth after caesarean 210–215

- midwifery education
- decolonisation 6–8
 - genomics 326–332
 - simulation-based training 123–129, 321–325
 - supporting autistic students 302–303
 - see also* student midwives
- midwifery profession
- debriefing 24–29
 - genomic competencies 326–332
 - mental health 17–23
 - pay 135–139
 - racial bias in 6–8, 130–134
 - retention of midwives 135–139
 - social media use 312–318
 - staff shortages 135–139
 - workplace culture 17–23
- midwifery-led care 17–23
- midwives' experiences
- bereavement care 55–60
 - midwifery-led care 17–23
 - place of birth discussions 349–356
 - student supervision 217–226
 - sudden infant death prevention 278–284
 - use of social media 312–318
- midwives' perspectives
- cannabis use in pregnancy 154–159
 - fetal monitoring 259–266
 - positions in labour 165–169
- miscarriage 241–247

N

- neonatal intensive care
- impact on maternal mental health 82
 - skin-to-skin care 375
 - sleep practices 374
 - specialist lactation support 84–89
- Nigeria 187–193
- Normalised Process Theory (NPT) 118–121

P

- pain
- hypnobirthing for pain relief 254–259
 - neonatal 363
 - perception of 30–38, 160–164
- parenting 177–182
- pay 135–139
- PEAR Study 342–346
- perinatal mental health 82, 115–118, 130–134, 357

perineal trauma 76–81, 359
place of birth 210–215, 349–356
population health 14–16
positions in labour 165–169
post-term pregnancy 43–49, 249–254
post-traumatic stress disorder 272–277
postnatal care
 contraception 170–176, 267–272, 360
 perineal wound care 76–81
 trauma-informed care 115–118, 272–277
postnatal depression 82
postnatal health
 help-seeking behaviour 361
 puerperal sepsis 362
 transition to parenthood 177–182
pre-eclampsia 106–109
pregnancy
 breastfeeding during 90–93
 cannabis use 154–159
 complications
 diabetes 70–75, 237–240
 HIV infection 50–53
 hyperemesis gravidarum 140–145, 248
 hypertensive disorders 94
 inflammatory bowel disease 39–42
 macrosomia 70–75, 347
 pre-eclampsia 106–109
 pregnancy loss 241–247
 sickle cell disease 334–341
 diet 248, 342–346
 influenza vaccination 348
 post-term 43–49, 249–254
 twin pregnancy 94
 women with complex social factors 227–
 234, 235–236
premature infants 83, 84–89, 375
preterm birth 358
proteinuria 106–109
publishing 11–13

Q
qualitative research 115–118
quality improvement 24–29, 358

R
racial bias 6–8, 130–134
racial disparities 6–8, 258, 306–308
reflective practice 6–8, 61–63, 90–93
research
 integration with midwifery 114–115

marginalised groups 309–311
Maternity and Infant Care (MIC) database
 9–10
qualitative 115–118
RCM research prioritisation project 208–
 209
RCM Small Research Awards 110–112,
 304–305
sickle cell disease 334–341
under-representation of Black women 306–
 308
 writing for publication 11–13
retention of midwives 135–139
role-playing 363
Royal College of Midwives (RCM)
 research prioritisation project 208–209
 Small Research Awards 110–112, 304–305

S
screening 154–159
sepsis 362
shoulder dystocia 70–75
sickle cell disease 334–341
simulation-based training 123–129, 321–325
skin-to-skin care 375
sleep practices 278–284, 374
social media 312–318
social support
 breastfeeding 90–93, 183–186, 364–373
 transition to parenthood 177–182
socioeconomic status 227–234, 235–236
staff shortages 135–139
stillbirth 55–60
student midwives
 autistic students 302–303
 breastfeeding support 90–93, 364–371
 clinical supervision 217–226
 experience of bereavement care 61–63
 experience of continuity of care 146–153
 knowledge and attitudes towards
 hyperemesis gravidarum 140–145
 leadership skills 6–8
 reflective practice 6–8, 61–63, 90–93
sudden infant death 278–284
suicide 115–118, 130–134
supervision of midwives 217–226

T
transition to parenthood 177–182
trauma-informed care 115–118, 272–277

twin pregnancy 94

U

ulcerative colitis 39–42

urine testing 106–109

V

vaccination in pregnancy 348

vaginal birth 64–69, 210–215

W

women-centred care 64–69

women's experiences

 induction of labour 249–254

 NICU admission 82

 postnatal wound care 76–81

 pregnancy loss care 241–247

 vaginal birth after caesarean 210–215

women's perceptions

 engagement with perinatal mental health
 services 130–134

 exclusive breastfeeding 187–193

 post-placental IUD insertion 267–272

workplace culture 17–23

wound care 76–81

writing for publication 11–13
