

MIDIRS Midwifery Digest 2024

A

advanced maternal age 201–204
antenatal care 49–50, 154–155, 156–160
antibiotics 164
apps 215–216
aquanatal classes 49–50
art therapy 356
asylum-seeking women 33–39, 340–345
autonomy 69–74, 236–241

B

Bali 139–142
bereavement care 14–18, 43–48, 230–235, 355, 356
bipolar disorder 315–318
birth centres 139–142
birth plans 242
birth trauma 19–23, 29–30, 194–197, 247
blood spot screening 358
body image 354
breastfeeding
 human milk microbiome 176
 lactational atrophic vaginitis 80–82
 lithium use 315–318
 premature infants 83, 359
 self-efficacy 83
 tongue tie 171–175
 women with disabilities 84
 women with perinatal mental health conditions 315–318, 357
 see also infant feeding
bullying 24–29
Bumi Sehat Foundation (Bali) 139–142

C

caesarean birth 170, 236–241
career development
 clinical academic midwifery 31–32
 digital apps 215–216
 leadership development 205–211, 307–311
 midwives' perspectives 200

 student reflections 9–12
child health 177
childbirth
 birth mode choices 236–241, 242
 television portrayal of 69–74
 see also labour
civility 312–314
clinical academic midwives 31–32
coaching 212–214
communication 120–123, 124–132, 223–225
complementary feeding 85
complementary therapies 356
continuity of care 124–132, 303–306
COVID-19 331–339, 346–351
culturally competent care
 evaluating women's experiences 110–112
 LGBTQ+ community 124–132
 postnatal health 353
 refugee and asylum-seeking women 33–39, 340–345

D

data management 282–289
decision making 63–68, 236–241, 242, 352
depression, in pregnancy 319–323
diabetes 149–153, 353
diet 176
disability, maternal 84
Down's syndrome 248–253
dystocia 243

E

education *see* midwifery education;
 student midwives
emotional intelligence 83
ethical issues 236–241
evidence-based practice 31–32, 102–106, 143–148, 223–225
exercise in pregnancy 49–50, 156–160

F

fathers 244–245, 247, 278–281, 355

female genital mutilation (FGM) 75–79
freedom of information requests 194–197
frenulotomy 171–175

G
group B *Streptococcus* 360

H
home birth 331–339
hyperemesis gravidarum 40–42, 143–148

I
i-learn research modules 107–109
Indonesia 139–142
induction of labour 63–68
inequalities in health
 evaluation of women's experiences
 110–112
 LGBTQ+ community 124–132
 postnatal care 353
 refugee and asylum-seeking women
 33–39, 340–345
infant feeding
 complementary feeding 85
 infants with Down's syndrome 248–253
 see also breastfeeding
infant growth 176
infant, newborn
 blood spot screening 358
 microbiome 176
 pain response 358
 physical examination 133–138
 sepsis 164, 360
 tongue-tie 171–175
infant, premature 83, 255–256, 359
infant, small for gestational age 149–153
informed choice 236–241
instrumental vaginal birth 165, 166
intensive care *see* neonatal intensive care
interpretation services 223–225
interpretative phenomenological analysis
 14–18, 113–119
intimate partner violence 169

J
journal clubs 102–106

K
Kenya 169

L
labour
 cumulative oxytocin dose 163
 dysfunctional 51–61
 induced 63–68
 instrumental vaginal birth 165, 166
 intrapartum ultrasound 166
 minimising perineal injury 352
 physiological plateaus 243
 use of antibiotics to reduce sepsis 164
 see also childbirth
labour ward coordinators 205–211
lactational atrophic vaginitis 80–82
language, use in practice 120–123, 124–132
leadership 205–211, 307–311
learning methods
 coaching 212–214
 digital apps 215–216
 journal clubs 102–106
 RCM i-learn research modules 107–109
 simulation-based training 14–18, 290–295
 virtual reality technologies 217–222, 290–295
legal issues 7–8
LGBTQ+ community 124–132
lithium 315–318

M
maternity services
 culturally competent care 33–39, 110–112, 124–132, 340–345, 353
 effect of COVID-19 pandemic 331–339, 346–351
 Indonesia 139–142
 Kenya 169
